

Main Seminar

Hot Topics in Bioinformatics

Alexandros Stamatakis

Preliminaries

- Seminar talks: 35 minutes + 10 minutes questions
- English or German
 - If you give the talk in English, I will judge language quality mildly
- **Reports: 8** pages in English or German
 - If you write the report in English, I will judge language quality mildly
 - Use Latex template (Springer LNCS) indicated on course web-page
- **Criteria:** Structure, Clarity, Precision of presentation
 - Use figures and drawings
 - Writing & Presentation skills very important if you consider a scientific career
 - check general writing tips and links on the course web page
- **Grade:** $\frac{1}{2}$ talk + $\frac{1}{2}$ report
- **Grades:** In the seminar my grading is very strict regarding language and presentation quality in the report & the presentation

Preliminaries II

- Don't underestimate the seminar 3 ECTS = 90 hours per semester
- No plagiarism
 - I am likely to notice!
 - I have caught someone almost every year thus far!
- Start working on the seminar on time!
- Know the background of the paper, that is, any algorithms/theories cited therein!

Topic Assignments

- To be determined

Deadlines

- Topic selection: **May 5** → via email
- Supervisor assignment by Alexis via email after all topics are set
- Meet with supervisor **at least twice** before your presentation!
- Talk slots: to be determined, but presentations will either be on *June 30, July 7, July 14* or in a block on *July 14* – to be discussed now
- Meet with supervisor **at least once** before handing in report
- Report Deadline – reports via email to me: **September 30**

Presentation Slots

- June 30
- July 7
- July 14

Schedule

- Today → how to give a scientific talk and write a report (Alexis)
- Presentations: To be announced

Topic selection

- I'd like to give you as much freedom as possible
- This will allow you to choose a topic you like
- If you like a topic, you will give a better presentation and write a better report
- Topic selection
 - Pick any of the papers mentioned in the course
 - Pick any topic of the course and ask me for a paper
 - Contact one of my lab members that taught last semester (Lukas, Benoit, Alexey) and ask them for a paper on *their* topic
 - Pick any interesting COVID-19 paper

Course Topics

- Sequence Analysis
 - Indexing techniques & suffix trees
 - Operations on strings
 - Sequence alignment
- Phylogenetics
 - Parsimony
 - Likelihood
 - Parallel computing in phylogenetics
 - Discrete operations on trees
 - Bayesian Inference
- Population Genetics
 - Coalescent models/method
 - Mixed phylogenetic & pop. gen. approaches

Topic Selection II

- Chose a recent paper you find interesting from the following journals
 - *Bioinformatics*
 - *BMC Bioinformatics*
 - *IEEE Transactions on Comp. Biol. & Bioinformatics*
 - *Systematic Biology*
 - *Molecular Biology and Evolution*
 - *BMC Algorithms for Molecular Biology*
 - *Nucleic Acids Research*

Topic Selection III

- You may also present a Bioinformatics topic that was not presented in the winter class (e.g., coalescent simulations in population genetics or protein structure prediction) in a more teaching like manner
- Do you think that it will work like this?

Reports

- Examples of good reports and nice slides from summer 2015 and 2016 are available on the course web page

<http://sco.h-its.org/exelixis/web/teaching/BioinformaticsModule.html>

Supervision

- To talk to your supervisors make an appointment via email
- Don't wait until the very last minute before your presentation to make an appointment → make them straight after the topic assignment
- You will be assigned one of my lab members to help you with preparing the talk, the presentation & the report
- They can come to KIT to meet you, except if you want to visit our institute in Heidelberg one day, you can also meet **virtually** depending on the pandemic
- Meetings with supervisors **must** take place

Your tasks

- Think about, search and select a topic by **May 5**
- Contact your supervisors (once assigned) **immediately** to schedule meetings! A total of at least three meetings are required!
